# Carbon Reduction Plan

Supplier name: Moore Stephens Insight Ltd T/A Moore Insight

Publication Date: 01/10/2023

### Commitment to achieving Net Zero

MOORE Insight is committed to achieving Net Zero emissions by 2050.

### **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
EMISSIONS	Total (tCO₂e)
Scope 1	0.0
Scope 2 <sup>1</sup>	0.4
Scope 3	651.5
Purchased Goods & Services	645.0
Capital Goods	0.0
Upstream Fuel & Energy	0.1
Upstream Transportation & Distribution	0.2
Waste Generated in Operations	0.0
Business Travel	1.9
Employee Commuting	4.3
Downstream Transportation & Distribution	0.0
Total Emissions	651.9

<sup>&</sup>lt;sup>1</sup>Market-based method used for reporting scope 2 emissions i.e. emissions specific to our electricity supply.

# **Current Emissions Footprint**

Reporting Year: 2022	
EMISSIONS	Total (tCO₂e)
Scope 1	0.0
Scope 2 <sup>1</sup>	3.0
Scope 3	595.1
Purchased Goods & Services	577.6
Capital Goods	0.0
Upstream Fuel & Energy	0.6
Upstream Transportation & Distribution	0.7
Waste Generated in Operations	0.0
Business Travel	10.5
Employee Commuting	5.7
Downstream Transportation & Distribution	0.0
Total Emissions	598.1

<sup>&</sup>lt;sup>1</sup>Market-based method used for reporting scope 2 emissions i.e. emissions specific to our electricity supply.

### **Emissions Reduction Targets**

In order to continue our progress to achieving Net Zero, we have adopted the following near-term and long-term science-based carbon reduction targets.

### **Near-Term**

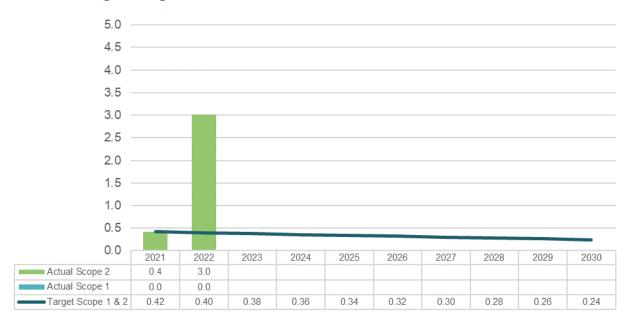

Near-term science-based targets cover an SME organisation's scope 1 and 2 emissions reduction targets to be achieved by 2030. For MOORE Insight, with base year (2021) scope 1 and 2 emissions of 0.4 tCO2e, a reduction of 42% will be required by 2030. This means scope 1 & 2 emissions should be no higher than 0.2 tCO2e by 2030.

### Long-Term

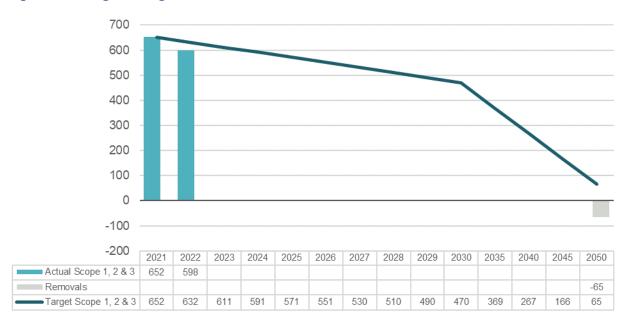

Long-term science-based targets show how much an organisation needs to reduce its total emissions (scope 1, 2 & 3) in order to reach net-zero. This is a minimum of a 90% reduction and needs to be achieved no later than 2050. MOORE Insight's total emissions in its 2021 base year were 652 tCO2e. By 2050, its total emissions should be no higher than 65 tCO2e, with the remaining emissions being permanently balanced through nature-based or technological solutions.

Progress against these targets can be seen in the graphs below:

# **Near-Term Target Progress**

# **Long-Term Target Progress**

### Carbon Reduction Projects

#### **Completed Carbon Reduction Initiatives**

The following environmental management measures and projects have been completed or implemented since the Base Year.

- Implementation of Cycle to Work Scheme
- Employee Electric Car Purchasing Scheme
- Implementation of Hybrid Working Policy
- Office recycling facility
- Reduction in single use plastics, reusable cups, glasses, water bottles, cutlery all implemented within the office.
- Awarded Plastic Free Champion Bronze Status
- Publishing of our Corporate Sustainability objectives aligned to the ISO 26000 International Standard for Social Responsibility and following its 7 principles, as outlined in our Corporate Social Responsibility Statement (MI Website)
- Social Ambition and Social Value our commitment as a member of the Moore Global Network to fight climate change as part of our initiative, which aligns with the 17 UN Sustainability Development Goals. More about this is shared on the Moore Global Website.

### In the future we hope to implement further measures such as:

- Move to 100% renewable purchased electricity by 2025
- Continued certification to 14064 and validation of reduction activities
- Improvements to recording of Associate/Consultant data and inclusion in relevant reduction schemes
- Focus on Employee travel:
- Encouraging the use of electric cars / modes of transport and public transport wherever possible for all our staff and associates.
  - Implementation of a car sharing scheme
  - Walk to work days
- Further reduction in single use plastics to upgrade our Plastic Free Champion status to silver level

### Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Protocol Standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Peter Morley, Director

Brian Mahon, Director

Brian A. Mahan
